

# Repetitive Payout Annuity Administration is Changing...

## rPay.net® is the reason.

OAS Software Corporation, an annuity administration provider since 1984, is introducing rPay.net. rPay.net is a completely redesigned, web-based repetitive payout annuity administration system using the latest Microsoft .NET® technology.

rPay.net supports Immediate Annuities, Supplementary Contracts, Structured Settlements and State Lotteries for both Fixed and Variable products. The rPay.net architecture is based on NAVA® and ACORD® standards and allows for quick product introductions.

rPay.net offers unique features and functionality that older, out-of-date payout systems simply can not provide. For more information on rPay.net, please visit [www.rpay.net](http://www.rpay.net) or contact us at (800) 546-2990 x113.
